Claims 6,8 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form.

In claims 6,8, " $0 < x \leq 1$ " is of broader scope than the " $0.05 \leq x \leq 1.2$ " range recited in the independent claims from which these claims depend..

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1,2,5,7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claims 1,2,5,7, "selected from a group consisting of" is improper Markush language which renders the claims indefinite.

Claims 1-10 are allowable over the cited prior art of record none of which teaches or suggests the instantly claimed combination of process steps having the instantly required preset density or tap density.

Claims 3,4,6,8-10 are objected to as dependent on a rejected base claim.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
